A bit worried about my Hilux. I know the injectors are the most notorious problem with these engines and am worried it's beginning to 'knock'. Had the car for 5,000 km, serviced myself the ...

### **2011 Hilux 1KD FTV - Engine Knock? Injector problems?**

The D4D, sorry, 1KD-FTV is not immune to seizing, even though it's 99 percent avoidable if you know where to look. The problem is caused by the oil pick-up in the sump becoming choked up with carbon and debris, restricting the flow of oil, thus destroying any chance of the motor getting the vital lubrication it so rightfully deserves.

### **TOYOTA 1KD/2KD ENGINE COMMON RAIL SYSTEM (CRS)**

Initially, the 1KD-FTV engine had copper seats at the base of the common rail injector to These seats, however, can fail and cause the following problems: Blow-by gases enter the tappet cover and mix with the engine oil - this bakes and carbonises the engine oil;

### **Recalls and faults: Toyota Mk.7 Hilux utility (2005-15)**

Specifically for the new-tech 1GD-FTV, Toyota Australia has admitted there is a design flaw in the air-inlet system that allows dust past the air filter, which in turn corrupts the sensor readings within the mass air flow sensor. The ECU then utilises these readings to determine the correct fuel ratios for the engine to run.
