Acrobat Javascript Scripting Guide 10

JavaScript is the cross-platform scripting language of the Adobe Acrobat family of products that includes Acrobat Professional, Acrobat Standard, and Adobe Reader. Through JavaScript extensions, the viewer application and its plug-ins expose much of their functionality to document authors, form designers, and plug-in developers.

For these situations, it is very important to use the fastest and most robust operations possible, and to include exception handling in the script so that errors are handled gracefully. One problematic JavaScript command is the `doc.getPageNthWord()` function. In Acrobat 9, this function became between 10 to 25 times slower than in previous versions.

Scripting for Actions in Acrobat X

Acrobat JavaScript enables you to perform calculations in form fields, respond to user actions, validate user data, modify appearance of Acrobat application, control the behavior of PDF documents, dynamically modify document's appearance and functions, process multiple PDF documents with batch sequences, dynamically create new pages based on template, interface to a database.
