Interferon is very important. • Interleukin -2 (regulates immune response) and blood clotting factor VIII have been recently cloned.

Applications of Genetic Engineering - LinkedIn SlideShare

The term genetic engineering initially referred to various techniques used for the modification or manipulation of

Where To Download

organisms through the processes of heredity and reproduction. As such, the term embraced both artificial selection and all the interventions of biomedical techniques, among them artificial insemination, in vitro fertilization (e.g., “test-tube” babies), cloning, and gene manipulation.
