## **Application Of Mathematics In Engineering**

Mathematics in Engineering is an international journal focused on quality applications of mathematics to science and engineering, engineering research based on advanced mathematical tools, and works in applied mathematics with relevance to engineering. The journal publishes innovative articles with solid theoretical foundations and concrete applications, after a rigorous peer-review process.

From the definition itself it is clear that the application of mathematics becomes indispensable for engineering. It is impossible to engineer something without the help of mathematics. Since the applications of mathematics in engineering are so vast and varied, it is not possible to summarize them.
