Amazon.com: Books

Water loss is classified in two ways: real losses and apparent losses. A real loss occurs whenever water physically escapes from the distribution system and never reaches the end-user. An apparent loss is caused by inaccurate accounting for water use; in this case, water reaches the end-user but the utility cannot properly account for it.

Drop-by-Drop Water Loss Prevention | WWD

Excessive water pressure is damaging Indiana homes, costing unsuspecting homeowners Utility companies must provide a minimum water pressure to all Indiana homes, but 13 Investigates discovered there is no rule to limit the maximum water pressure. 13 Investigates This is how companies will (or won't) enforce their new mask rules
