noting that although Wikibooks' editors are sharp-eyed, some less scrupulous contributors may plagiarize copyright-protected work by other authors. Some recipes, for example, appear to be paraphrased from well-known chefs.

Continental 65 Engine

Continental Motors was the world's largest manufacturer of automotive engines during the 1920's. Its earliest venture in aircraft engines during the mid-1920s was the radial type, but Continental only became successful in aviation with the horizontally opposed type. The combination of the Continental A-65 engine and the Piper J-3 Cub airframe promoted the great growth of sport aviation by providing a dependable, inexpensive airplane with adequate performance and in sufficient quantity to

Welcome to Continental Aerospace Technologies' Factory New ...

The A-65 is a good engine, but tapered cranks tend to be cracked at the keyway, the magnesium accessory cases tend to rot, the oil pump pockets go bad, and finding good cylinders can be a problem. Don't get me wrong, the A-65 is a really fine engine and continues to be a bargain, but the O-200 is kind of a

Superior Air Parts :: Parts for Continental Engines

Around 1943, Continental began work on an engine series based on a new cylinder with a 4.0625" bore, an increase of 0.1875" from the 3.875" bore used in A-series engines. Stroke remained at 3.6250", and the compression ratio remained at the same 6.3:1 value that had been used in A-65s and A75s, allowing the use of 73 octane fuel.
