The model H engine was 4-7/8 by 6 same as a lot of old Macks 673 Cubic inch displacement. With the NH the bore was not large enough for the valves so the bore was increased to 5-1/8 inch 743 cubic inches if I remember correctly.

Cummins Models H and NH Diesels - Antique Engines Antique ...

The first 335 was a 743 engine. Not many around any more but it was in the years of the B models. The way to tell is if it has lines on the out side of the head to the injectors like the 220 and 262 then it will be a 5 1/8 bore engine with piston oil coolers.
