The electric brake pin should be in the 5 o'clock position. If no power is present, proceed to Method 3. With the trailer connected, check for power on the electric brake wire coming out of the trailer's 7-Way plug. You can repeat the test on this wire, moving further back toward the magnets each time.

Electric Trailer Brakes

your trailer brakes should be burnished-in by applying the brakes 10-30 times with approximately a 10 m.p.h. decrease in speed, e.g. 40 m.p.h. to 30 m.p.h. Allow ample time for brakes to cool between application.

OPERATION MAINTENANCE SERVICE MANUAL - Dexter Brakes

Cause and Solution: If your electric trailer RV

Acces PDF Electric Trailer Brakes

brakes are well maintained and properly installed, there is a good chance any trouble you have with them will be related to electrical current. If your brakes are not providing enough stopping power, seem to only intermittently work well, or have other issues, it is best to have the controller and current checked by a brake professional.
