STAMPING Journal is the only industrial publication dedicated solely to serving the needs of the metal stamping market. Since 1989 the publication has been dedicated to covering the cutting-edge technologies, industry trends, best practices, and news that help stamping professionals run their businesses more efficiently.

### STAMPING Journal - The FABRICATOR

Post-transition metals are a set of metallic elements in the periodic table located between the transition metals to their left, and the metalloids to their right. Depending on where these adjacent groups are judged to begin and end, there are at least five competing proposals for which elements to include: the three most common contain six, ten and thirteen elements, respectively (see image).

### Post-transition metal - Wikipedia

In this article one of costing systems, activity-based costing system (ABC), investigated with differences of traditional systems. ABC aims that to solve problems created by conventional costing ...
