Hello, I'm a newby and I don't know MQL really :-). But I want to create a new Attribute in Enovia for classification our CAD Parts. We had allready a lot of attributes but some are missing. I know the command to modify the attribute or it's range, but I don't know the command to create one. Can someone help me? Thx in advance! Reply Delete

Enovia PLM: MQL Commands

ENOVIA VPLM (ENOVIA for short) as an application is actually made up of four different parts. There is an ENOVIA database which holds all the meta data and attributes for all the documents, files, and parts stored in the vault. The database also manages users, permissions, and other ENOVIA specific objects such as product classes, actions, change
