Online Library Environmental Hazards

In the EU, the risk assessment is based on a comparison of the predicted environmental concentration (PEC) and the predicted no-effect concentration (PNEC), the so-called PEC/PNEC ratio. In the United States, the EA is based on a comparison of the MEEC with the lowest EC50 divided by an appropriate assessment factor.

**Environmental Risk
Assessment - an
overview ...**

Environmental risk management seeks to determine what environmental risks exist and then determine how to manage those risk in a way best suited to protect human health and the environment.

Online Library Environmental Hazards

Hazard Identification and Assessment One of the "root causes" of workplace injuries, illnesses, and incidents is the failure to identify or recognize hazards that are present, or that could have been anticipated. A critical element of any effective safety and health program is a proactive, ongoing process to identify and assess such hazards.
