Experimental Design By Cochran And

Gertrude Cox and William Cochran were both famous statisticians who were extremely good writers. This was the book on experimental designs in 1958 with a wealth of information on randomized block, factorial and fractional factorial designs. It is still a very useful and practical reference.

Experimental Design Summary Experimental Design Summary Experimental design refers to how participants are allocated to the different conditions (or IV levels) in an experiment. There are three types: 1. Independent measures / between-groups: Different participants are used in each condition of the independent variable. 2. Repeated measures /within-groups: The same participants take part in ...

Experimental designs (Book, 1957) [WorldCat.org]

It was designed by its author "to give a comprehensive nonmathematical course on the design and analysis of experiments...in conjunction with a textbook on statistical analysis [and]...to avoid statistical and mathematical technicalities and to concentrate on a treatment that will be intuitively acceptable to the experimental worker, for whom the book is primarily intended."
