This effective text emphasizes the analysis and interpretation of the end result of financial reporting--financial statements. The author focuses on the language and preparation of financial statements throughout. Students analyze real financial reports, 10Ks, proxy statements, other exhibits, and cases drawn from actual companies.

### Financial Reporting and Analysis: Using Financial ...

Financial statement reporting and analysis are two different things but of the same background. Financial reporting refers to the document that specifies and releases the financial statement and other information to its stakeholders and other public. This sort of document adds balance sheets, cash flow, net income, and other asset capital details. Whereas financial analysis is the evaluation and study of the different businesses and works to regulate its performance.
