Barthel Index for Activities of Daily Living (ADL) - MDCalc

The Barthel ADL Index: Guidelines 1. The index should be used as a record of what a patient does, not as a record of what a patient could do. 2. The main aim is to establish degree of independence from any help, physical or verbal, however minor and for whatever reason. 3. The need for supervision renders the patient not independent. 4.

The Barthel Index - Brain Attack Coalition

The Barthel Index was originally published in 1965 in the Maryland State Medical Journal. The Barthel Index is designed to measure the ability of an individual with a neuromuscular or musculoskeletal disorder to care for oneself. It consists of 10 questions that relate to degree of independence with activities of daily living (ADLs).
