Central Air Conditioner Installation Guide | HVAC.com®

When connecting the pipes to the unit during an air conditioning installation, put a tiny drop of oil on all of the facings first. Next, attach the pipes to the brass cones and tighten with two wrenches. Be careful not to overtighten. The copper pipes need to be covered with foam insulation and you should put foam over all the connecting parts. Make sure no refrigerant is leaking from any of the connectors when you start the unit.

Air Conditioning Installation Guide | DoItYourself.com

Installing a ductless split air conditioner is more complicated than a window unit but far less complicated than installing central air. An HVAC professional will need to run lines for the coolant, electricity, and drainage. You will also need a HVAC professional to charge it with the right amount of coolants.
