The term API is an acronym, and it stands for "Application Programming Interface." Think of an API like a menu in a restaurant. The menu provides a list of dishes you can order, along with a description of each dish. When you specify what menu items you want, the restaurant's kitchen does the work and provides you with some finished dishes.

What Is an API?
Choose Google Maps Platform to create immersive location experiences and make better business decisions with accurate real time data & dynamic imagery.

The Core Bluetooth framework provides the classes needed for your apps to communicate with Bluetooth-equipped low energy (LE) and Basic Rate / Enhanced Data Rate (BR/EDR) wireless technology. Don't subclass any of the classes of the Core Bluetooth framework. Overriding these classes isn't supported and results in undefined behavior.
