The operating system on ARCHER is the Cray Linux Environment (CLE) that in turn is based on SuSE Linux. CLE consists of two components: CLE and Compute Node Linux (CNL). The service nodes, external login nodes, and post-processing nodes of ARCHER run a full-featured version of Linux. The compute nodes of ARCHER run CNL.

ARCHER » 2. System Architecture and Configuration

This book is spot on covering the important parts of the classic operating systems curriculum from the sublime Tannebaum to the feckless Nutt. This book has an abundance of sample problems from all the major topics: File Systems, Interprocess communication, Device I/O, Networks, Security, and the dreaded Virtual Memory.
