If you are moving to the Cloud then this adapter can change to Oracle Object Storage Cloud. This reduces the need to change individual places that uses the alias. It is recommended to take advantage of this capability: Create an alias per location you read or write files from in your Batch Controls. Define it using the Native File Storage adapter. Try and create the minimum number of alias as possible to reduce maintenance costs.

relationships). The translator can handle both XML and non-XML (native) formats of data.

### **Oracle JCA Adapter for Files/FTP**

Mediator supports Oracle JCA Adapters and enables you to define inbound and outbound adapter services for each. An inbound adapter service receives data from an external messaging system and transforms it into an XML message. An outbound adapter service sends data to a target application by transforming an XML message into the native format of the given adapter.
