## **Welcome to EFTPS online**

A payment system is any system used to settle financial transactions through the transfer of monetary value. This includes the institutions, instruments, people, rules, procedures, standards, and technologies that make its exchange possible. A common type of payment system is called an operational network that links bank accounts and provides for monetary exchange using bank deposits. Some payment systems also include credit mechanisms, which are essentially a different aspect of payment. Payment

When it comes to domestic payments, the U.S. financial system still lags the efficiency in several advanced economies. In 2015, paper checks—a 14th century innovation—still accounted for roughly 15 percent of U.S. noncash payments—both in number and value. (The bulk of transactions in number are by credit or debit card, and in value by ACH.)
