Tech Tip 124: How to time a Perkins engine properly

Engine timing 8 General description The timing gears are stamped with timing marks (A) to ensure that they are assembled correctly. The stamped teeth of the crankshaft, camshaft and fuel pump gears will be aligned with the idler gear when number 1 piston is at top dead centre (TDC) on the compression stroke.

Engine timing 8 - Quality Service Manual

On the older Perkins engines (up to mid eighties, early 90's) the injection pumps were dummy splined. The three bolts that hold the injection pump on are in slots. There is usually a mark on the base of the pump that the injection pump rebuilder puts on showing the timing and you will find a scribed mark on the block to line it up with.

Perkins Engines

There are no timing marks on the fuel pump gear of engine types AE and YE. The gear, which is fastened to a hub on the drive shaft of the fuel injection pump, has slots to allow adjustment to the timing. A data plate is fitted to the pump. An example of the information shown on the plate (B) is: Perkins part number (1) Fuel pump code (2)
