Real options valuation, also often termed real options analysis, (ROV or ROA) applies option valuation techniques to capital budgeting decisions. A real option itself, is the right—but not the obligation—to undertake certain business initiatives, such as deferring, abandoning, expanding, staging, or contracting a capital investment project. For example, the opportunity to invest in the ...

Real options valuation - Wikipedia

Real options steer management toward maximizing opportunity while minimizing obligation, encouraging it to think of every situation as an initial investment against future possibility. "In real options, we assume that the underlying variable is the future profitability of the project, which is the future cash flow series.
