Regional Geography Of Canada 5th

In the fifth edition of The Regional Geography of Canada, Robert Bone has refined and updated his study of Canadian geography through six identified regions: Atlantic Canada, Quebec, Ontario, Western Canada, British Columbia, and the Territorial North. The text examines the distinctive physical, historical, cultural, social and economic features of each region to determine their place within the overall structure of Canada, while also taking into account their relevance within a global context.

The Regional Geography Of Canada 5th Edition

In northernmost Canada only 12 per cent of the land is suitable for agriculture because of the harsh climate. As a result, most of the population of Canada live within a few hundred kilometres of the southern border, where the climate is milder. We also have a more thorough description of the regional geography of Canada.

Geography - Your Canada

Canada is made up of five geographic regions, the Atlantic Provinces, Central Canada, the Prairies, the West Coast, and the Northern Territories. The Northern Territories are the most severely affected by global warming. Canada is the second biggest country in the world, measuring about ten million square kilometers.
