Rules and Strategies For Profitable Short Selling

The biggest risk in short selling is the potential for infinite loss. When you go long an asset, you know you can lose 100% of your investment if the stock price drops to \$0. As bad as that loss is, at least your potential loss stops at your initial investment. Short sale losses, on the other hand, are limitless.

Should You Short Sell Stocks? - Rules, Risks & Strategies

Short-term strategy Selling short is primarily designed for short-term opportunities in stocks or other investments that you expect to decline in price. The primary risk of shorting a stock is that it will actually increase in value, resulting in a loss.
