The T.V. of Tomorrow is a 1953 animated theatrical short directed by Tex Avery. It was part of series of cartoons Avery did satirizing technology of the future which included: The House of Tomorrow, The Car of Tomorrow, and The Farm of Tomorrow. These were parodies of live action promotional films that were commonly shown in theaters at the time.

The T.V. of Tomorrow - Wikipedia

Directed by Tex Avery. With Paul Frees, Joi Lansing, Dave O'Brien. A variety of fanciful innovations in "future" T.V. sets, including a model with a built-in stove, and a number of highly interactive models. And of course, even with dozens of channels, there's nothing on...or more accurately, there's nothing but the same Western.
